Cheryl Lewis Patent Examiner December 28, 2006

Art Unit: 2167

#### **DETAILED ACTION**

1. Claims 1-21 are allowed.

## **Drawings**

2. The drawings filed on September 12, 2003 are accepted by the Examiner.

#### **EXAMINER'S AMENDMENT**

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in an interview with Kent Stier on October 12, 2006.

4. The Specification has been amended as follows:

on page 1, line 19, replace "MICROSYSTEMS" with MICROSYSTEMS®, replace "ACTIVEX" with ACTIVEX®, and replace "MICROSOFT CORPORATION" with MICROSOFT CORPORATION®; and on line 21, replace "ACTIVEX" with ACTIVEX®;

on page 6, line 26, replace "WINDOWS XP" with <u>WINDOWS XP®</u>; and on line 27, replace "CORPORATION" with <u>CORPORATION®</u>;

on page 7, line 2, replace "INTERNET EXPLORER" with <u>INTERNET</u>

EXPLORER®; on line 3, replace "MICROSOFT CORPORATION" with <u>MICROSOFT</u>

Art Unit: 2167

CORPORATION®, replace "NETSCAPE NAVIGATOR" with NETSCAPE®

NAVIGATOR; on line 4 replace "NETSCAPE CORPORATION" with NETSCAPE®

CORPORATION; on line 7, replace "INTERNET EXPLORER" with INTERNET

EXPLORER®; on line 9, replace "MICROSOFT CORPORATION" with MICROSOFT

CORPORATION®; on line 17, replace "MICROSOFT CORPORATION" with

MICROSOFT CORPORATION®; and on line 29, replace "ACTIVEX" with ACTIVEX®;

on page 8, line 18, replace "EXCEL" with <u>EXCEL®</u>; on line 19, replace "MICROSOFT CORPORATION" with <u>MICROSOFT CORPORATION®</u>; and

on page 9, lines 7, replace "WINDOWS SERVER 2003" with WINDOWS®

SERVER 2003; on line 8, replace "MICROSOFT CORPORATION" with MICROSOFT

CORPORATION®; on line 11, replace "MICROSOFT CORPORATION" with

MICROSOFT CORPORATION®; on line 15, replace "MICROSOFT" with

MICROSOFT®; on line 23, replace "MICROSOFT CORPORATION" with MICROSOFT

CORPORATION®.

- 5. Claims 1 and 15-19 have been amended as follows:
  - (Currently Amended) A method for exposing property values maintained at a server computer to an application executing on a client computer, the method comprising:

receiving, at the server computer, a request for a resource from the application executing on the client computer at the server computer for a resource;

determining, at the server computer, whether a property value maintained at the server computer should be returned with the resource;

Art Unit: 2167

in response to determining, at the server computer, that the property value should be returned with the resource, retrieving, at the server computer, the current value of the property, wherein retrieving the current value comprises identifying a location of the property from an Extensible Markup Language (XML) map;

rendering, at the server computer, into the resource a variable statement specifying the current value of the property; and

returning, from the server computer, the resource including the variable statement to the requesting application executing on the client computer.

15. (Currently Amended) A computer-readable storage medium which stores a set of instructions which when executed performs a method for having an extensible markup language data structure stored thereon for use in exposing a property value stored at a server computer to a client computer, the method executed by the set of instructions data structure comprising:

receiving, at the server computer from the client computer, a request for a resource;

in response to receiving the request from the client computer, determining, at the server computer, that a server property tag indicating whether indicates that a property value, maintained at the server computer, should is to be exposed to the client computer within a the resource requested by the client computer, the property value being stored in an extensible markup language data structure; and

in response to determining that the server property tag indicates that the property value is to be exposed to the client computer, transmitting, from the server computer to

Art Unit: 2167

the client computer, the property value within the resource requested by the client computer.

Page 5

- 16. (Currently Amended) The computer-readable <u>storage</u> medium of Claim
  15, wherein <u>determining that the server property tag indicates that the property value is to be exposed further comprises determining that the server property tag indicates that <u>the property value is to be exposed wherein</u> the server property tag further comprises a property parameter that identifies a name utilized by the server computer to identify the property value.</u>
- 17. (Currently Amended) The computer-readable <u>storage</u> medium of Claim
  16, wherein <u>determining that the server property tag indicates that the property value is</u>
  to be exposed further comprises determining that the server property tag indicates that
  the property value is to be exposed wherein the server property tag further comprises a
  name parameter that identifies a name that should be utilized by the client computer to
  refer to the property value within a variable statement.
- 18. (Currently Amended) The computer-readable <u>storage</u> medium of Claim 17, further comprising <u>transmitting</u>, from the <u>server computer</u> to the client <u>computer</u>,[[:]] one or more data fields that include program code that may be executed on the client computer to utilize the variable statement.
- 19. (Currently Amended) A method for exposing property values maintained at a server computer to an object executing within a web browser on a client computer, the method comprising:

Art Unit: 2167

receiving, at the server computer, a request for a displayable web page from the web browser executing on the client computer at the server computer for a displayable web page;

consulting, at the server computer, a solution specification file associated with the web page to determine whether a property value maintained at the server computer should be returned with the web page;

in response to determining, at the server computer, that the property value should be returned with the resource, retrieving, at the server computer, the current value of the property from a location within the server computer, wherein retrieving the current value comprises identifying a location of the property from an Extensible Markup Language (XML) map;

rendering, at the server computer, into the web page a variable statement specifying the current value of the property; and

returning, from the server computer, the web page, including the variable statement, to the requesting web browser executing on the client computer.

#### REASONS FOR ALLOWANCE

6. The following is a statement of reasons for the indication of allowable subject matter:

Applicants' response filed on July 31, 2006 overcomes the prior art rejection under 35 USC § 102(e) by Zhao.

Art Unit: 2167

The prior art of record does not render obvious to one ordinarily skilled in the art at the time of applicant's invention nor anticipate the combination of claimed elements including 'determining, at the server computer, whether a property value maintained at the server computer should be returned with the resource; in response to determining, at the server computer, that the property value should be returned with the resource, retrieving, at the server computer, the current value of the property, wherein retrieving the current value comprises identifying a location of the property from an Extensible Markup Language (XML) map' as recited in independent claim 1 and similarly recited in independent claims 9, 15, and 19.

The remaining claims 3-8, 10-14, 16-18, 20, and 21 are dependent claims, thus these claims are patently distinct over the art of record for at least the above reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### NAME OF CONTACT

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cheryl Lewis whose telephone number is (571) 272-4113. The examiner can normally be reached on 6:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Cottingham can be reached on (571) 272-7079. The fax phone

Art Unit: 2167

number for the organization where this application or proceeding is assigned is (571) 273-8300.

(571) 273-4113 (Use this FAX #, only after approval by Examiner, for "INFORMAL" or "DRAFT" communication. Examiners may request that a formal paper/amendment be faxed directly to them on occasions.).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist/ Technology Center (571) 272-2100.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see <a href="http://pair-direct.uspto.gov">http://pair-direct.uspto.gov</a>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
